Alkurdi

شركة الكردي للتجارة والمقاولات
Al Kurdi Trading & Contracting Co.

History

Al Kurdi Trading & Contracting Company was established in 1979 to provide computer site preparation services. Al Kurdi has steadily expanded into other specialty services in Electrical, Electronics and Mechanical Engineering Fields, Fire and Security Systems, Power and Power System.
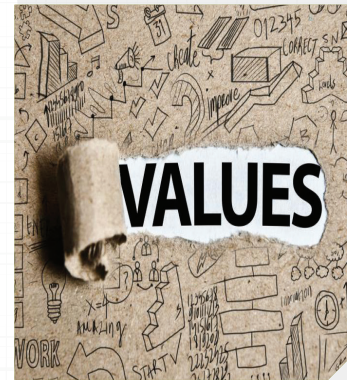

Mission

We strive to offer the best solutions for fire, safety and security with a complete range of services including design, supply, installation, testing & commissioning, and after sales services.

Vision

Creating a safe and secure place to live and work.

Values

- We care about our clients and partners
- We serve with professionalism and honesty
- We consider our team as part of Alkurdi family.
- We work together as a team
- We enjoy our work.
- We are here for the long term.

Alkurdi

Fire Alarm Systems

Al Kurdi Trading and Contracting offers a complete range of Fire Detection solutions from Tyco Fire & Security to the specific requirements for every market.

ZETTLER & FireClass , is a leading brand of fire detection & security from Tyco Fire and Security.

Our Products include

-High Sensitivity smoke detection system
-Industrial fire detection with SIL2 certification
-Smoke management & life safety systems

Alkurdi

Fire Fighting Systems

We are providing various types of fire suppression systems such as FM200, NOVEC 1230, CO2 and other product ranges from Macron Safety Systems/Johnson Controls.

Al-Kurdi Co. offers complete range of FM200 and Novec1230 system required for Data Center, Command and Control rooms, Switch-gear rooms, Electrical rooms, Telecom & UPS rooms.

We also offer Aerosol fire suppression system

Alkurdi

Access Control & Time Attendance Systems

We are distributor in the kingdom of Saudi Arabia for Suprema. Suprema is the well-known manufacturers of access control & time management systems.

• Outdoor Indoor Biometrics or RFID readers to face detection with temperature monitoring camera or fingerprint with RFID or pin numbers centralized or IP systems supported by one of the best platform for access control & time attendance.

• BioStar 2 is a web-based, open, & integrated security platform that provides comprehenive functionality for access control & time & attendance.

• Featuring a modular, flexible framework. Access control & time attendance system is required in all fieids & scale industries:

Suprema is the best choice to protect your business. Suprema is the worlds best performing bio-metrics, facial recognition & fingerprint recognition technology with temperature monitoring camera.

Alkurdi Co. provides you with the best from design stage to implementational way.

CCTV -
Video Surveillance

We are providing a wide range of video security solutions

Video surveillance systems and cameras offer peace of min, giving you a real time view of what's happening around your home or business. Since they're often clearly visible, they also serve as an effective deterrent. Even if you're not at home or in the office, they record footage for later review, helping prevent package theft, intrusion, or vandalism. You can also set some security video cameras to only activate and record when motion is detected, saving camera power and drive space.

We are providing a wide range of CCTV solutions

Room Environment Monitoring

RoomAlert is AVTECH's online service, designed to make it easy to monitor temperature and environmental conditions from anywhere, at any time, via the internet. Enjoy the same alert interface from any device.

RoomAlert is designed specifically to assist with monitoring temperature & other environmental conditions without the worries of installing software, configuring an email server, configuring network settings, allocating disk storage, or running regular data backups. RoomAlert handles all of this automatically in the cloud, with a user experience that is always consistent whether on a desktop, laptop, tablet or mobile device.

Raised Floor

Do you want building, computing and communications technology to be easily accessible? Raised floors provide the ideal conditions to do this. The panels are installed without the need for screeding, thus enabling access to the cavity at any given point, guarenteeing ease on maintenance. Raised floors also provide an added extra in flexibility - they can be adabted quickly and easily to meet new demands.

- Computing, building and communications technology can be laid within the floor void.

- Easy maintenance of data cables and building technology.

- Can be easily adepted to meet new requirements.

- The most modern interior fit-out solution for offices.

UPS & BATTERIES
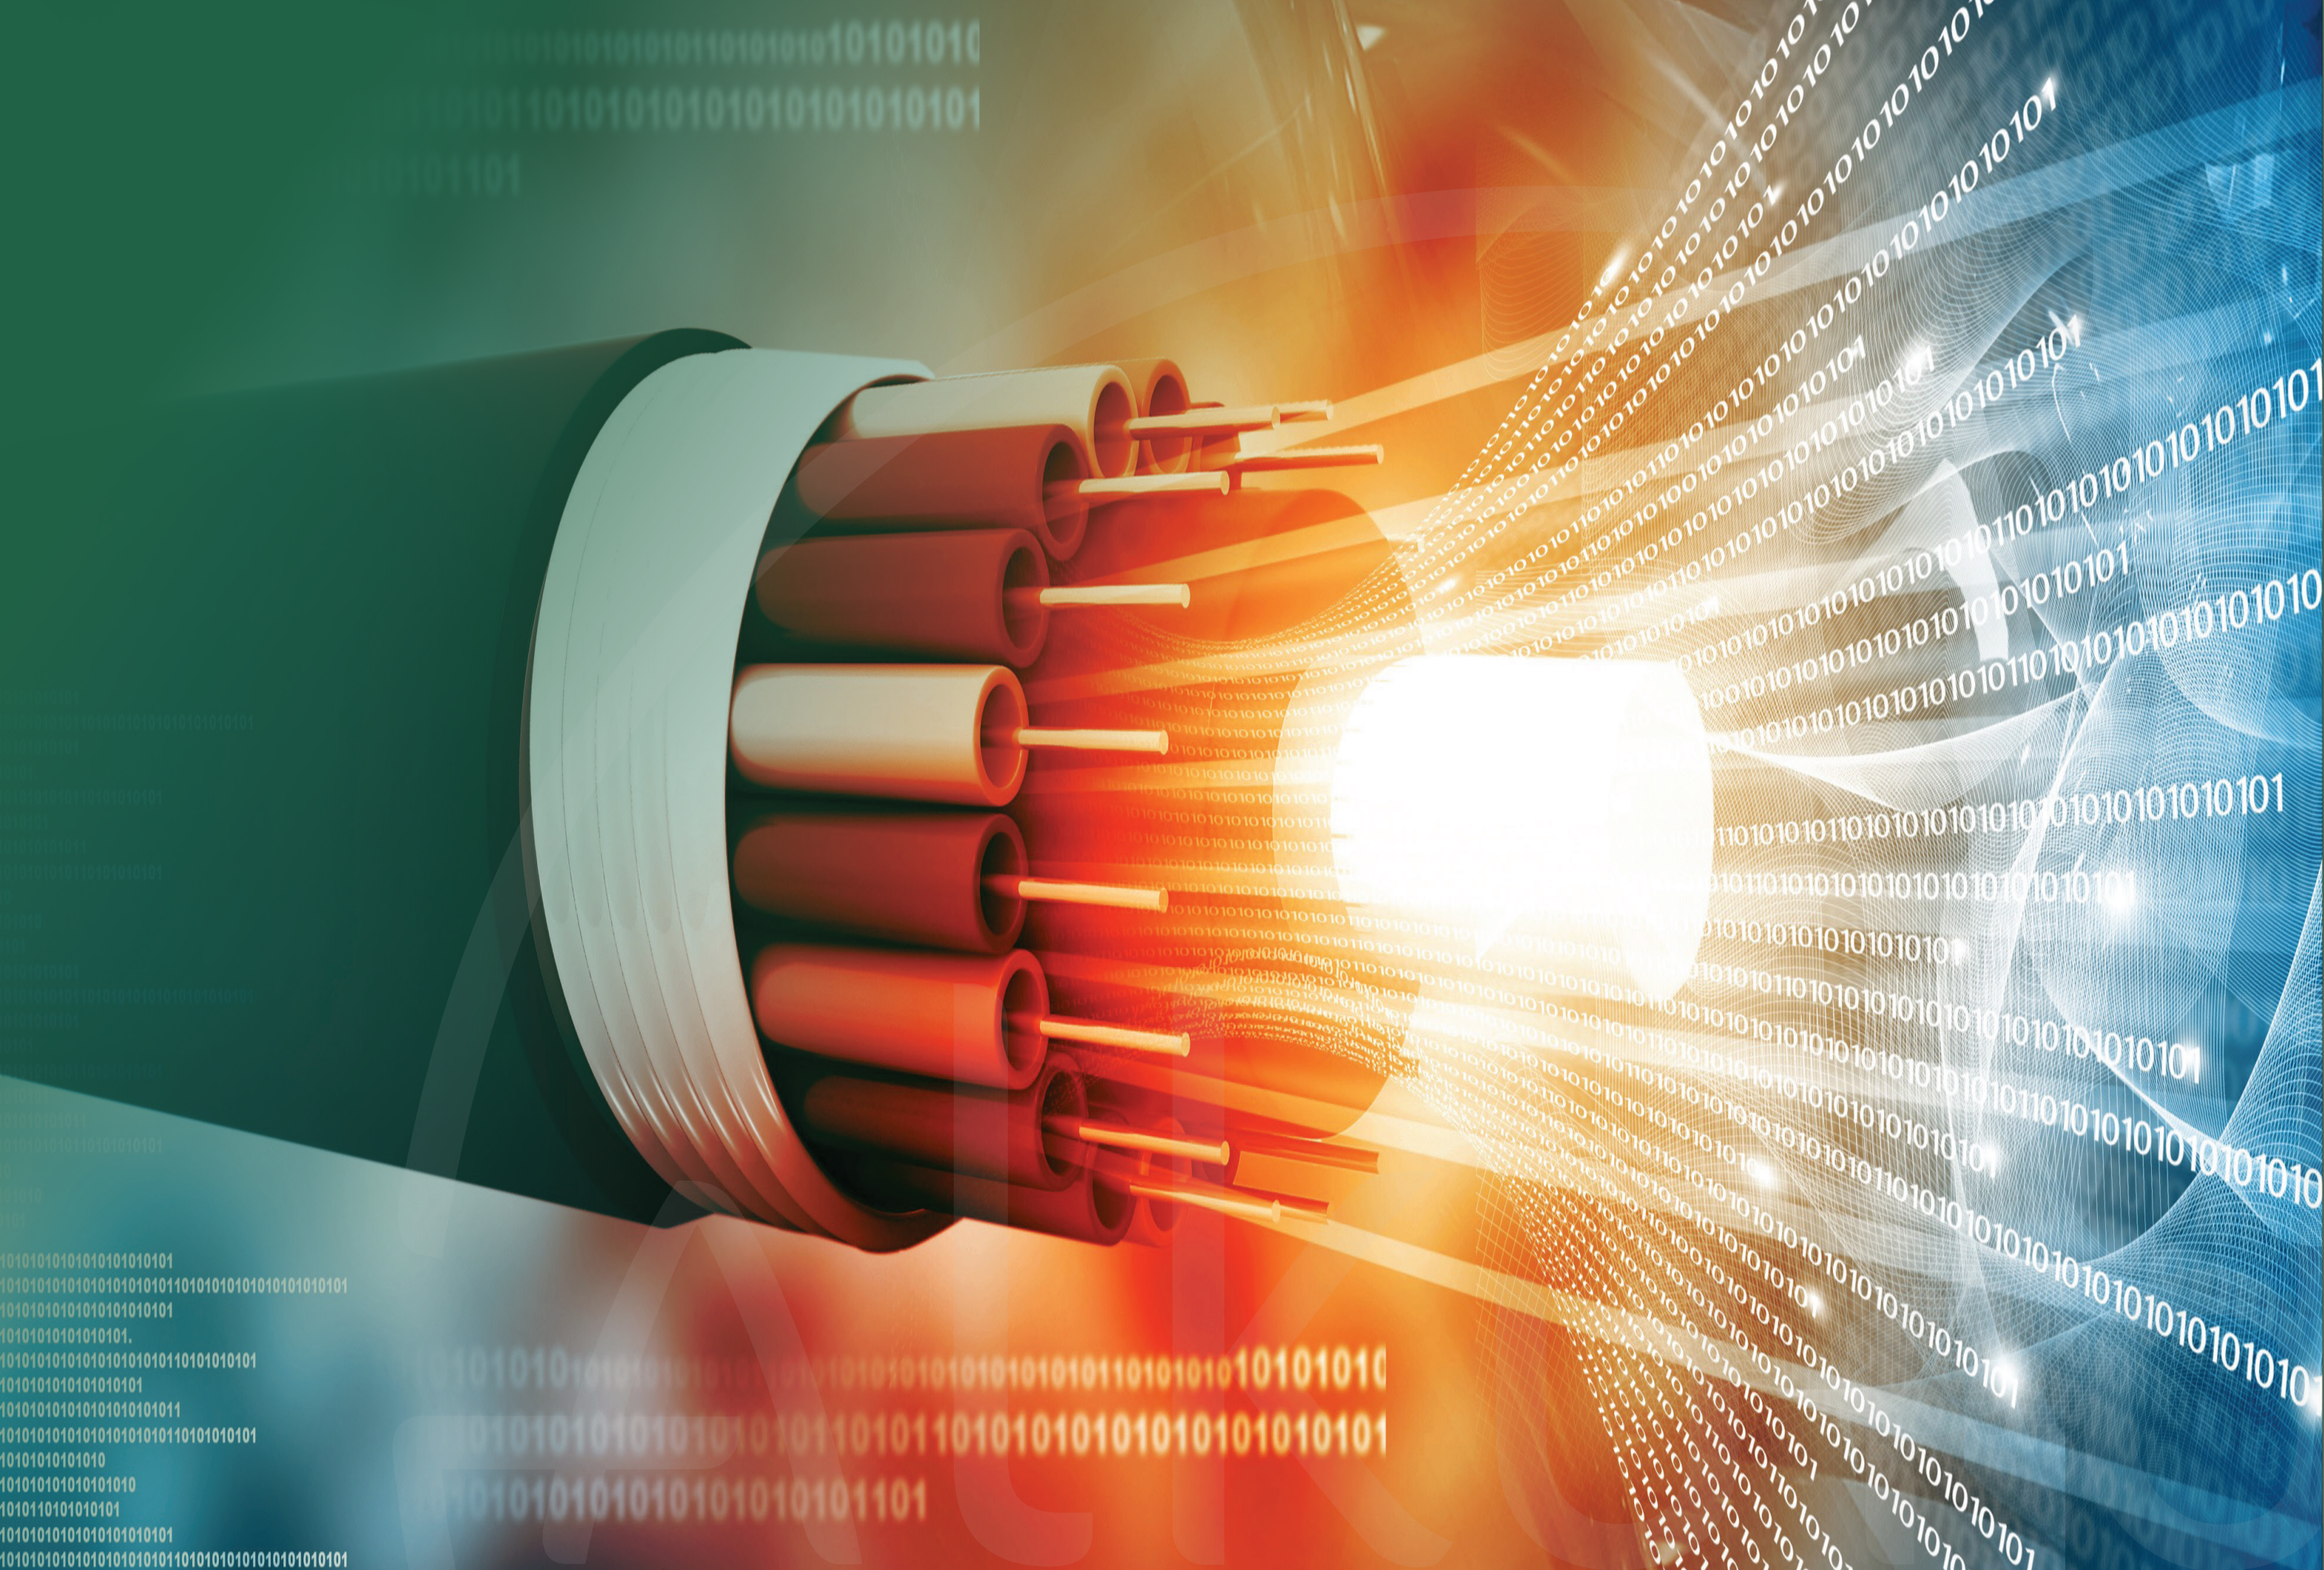

Uninterruptible power supplies

Uninterruptible power supplies (UPS) are used for critical applications where a failure of the mains supply, however brief, is unacceptable. Computer systems are a good example of such an application as are critical control systems, life support systems, etc. A local source of energy must be available in order to continue to supply the load in cases of the failure of the incoming mains supply. In the case of large installations, a standby diesel generator is required.

Alkurdi Co. provides you with complete power solutions, its principal products range includes:

- Uninterruptible Power System (UPS)
- Static UPS from 250 VA to 800 KVA
- Dynamic UPS from 15 KVA to 1679 KVA
- AC/ DC Distribution Systems
- Rectifiers & Chargers
- Inverters & Power Supplies
- Up to 2 MVA Generators
- Voltage Regulators, Static & Servo Controlled types Transformers

Control & Network Cables

We are offering significant products portfolio for data communication networks and other applications. These cables are designed especially for data industrial applications, and assure performance in even the harshest environments.
